

Waste Water Treatment Plant Saved Almost \$900,000 with USI's Help

Extend the life of your pipes!

This waste water plant was seeing corrosion of header pipes caused by H₂S. They couldn't continue with the pipes in this state, but the current line wasn't going to be needed in 3 to 5 years, as a new treatment plant was in future budget plans.

USI GROUP'S SOLUTION: Unconventional Solutions, contacted several manufacturers of composite pipe repair systems, and selected Duromar, as they were willing to engineer a system designed for 5 plus years of service, thereby meeting and exceeding the client's needs.

A replacement pipe was going to cost over \$1 million. This repair was only \$110,000, saving nearly \$900,000 – plus no downtime, as made the repair was made while the pipe was in service.

At USI, we are using every opportunity to serve your needs in the highest capacity possible.

With online webinars and training tutorials for all of our products, we are ensuring that every installation is completed properly the first time. Through adding the educational sessions provided at no additional cost, we align ourselves as partners, and not simply suppliers of **Resimac**, **Duromar**, **Stop-It™** and **3M** Infrastructure Protection Products.

We look forward to the opportunity to serve you in this capacity and with whatever needs present themselves to you in the future. Call to schedule a time for application or product questions, along with technical support, training, and troubleshooting. 

Stop It® HP™ Pipe Repair Kit is made to use on pipes and comes with 2-part cartridge with gun.

Stop It® HP™ utilizes a pre-measured 2-part epoxy system combined with high performance, aramid fiber fabrics to provide superior leak sealing capacity with strong interfacial bonding. **Stop It® HP™** is recommended for high pressure applications up to 2,000 psi (140 kg/cm²) with a built in 5:1 safety margin. Repairs to high pressure process piping may be completed in as little as 4 hours.

Stop It® HP™ is supplied in a kit with all of the necessary components for field installation. Installation requires no special training and involves minimal surface preparation. Standard kits for repair of pipes up to 4" diameter are available; non-standard kits can be custom made to order with short delivery times.

Stop It® HP™ Pipe Repair Kit comes with Cartridge and Gun! **248.735.7000**
