Concrete Stair Refurbishment: Durable and Safe Concrete Step and Entryway Coating/Repair

The client wanted concrete stair restoration and was worried about the longevity and security of the concrete steps and entryways into their buildings. They were looking for a long-lasting option. Since the current paint was deteriorating, it had to be completely removed and replaced. The customer placed a high priority on safety and was especially looking for a non-skid solution to stop slips and falls.

Because the concrete steps and entryways were subjected to everyday use and weather, a durable and long-lasting coating solution was required.

In order to meet the needs of the client, Unconventional Solutions, Inc. (USI) put in place a thorough repair and coating procedure.

- Coating Removal
- Concrete Preparation
- Primer Application
- Deck Coating Membrane
- Non-Skid Coating

The project was successful and finished on schedule in spite of delays caused by bad weather. The concrete entryways and steps are now far more durable and safe thanks to the new coating technology. The client has already ordered the restoration of a second set of stairs due to the positive outcome.

Our comprehensive approach ensures your surfaces are not only restored but also enhanced for long-term performance and safety. Contact us today!

Resimac Resichem 576 Quartz Screed stands out as a high-strength, solvent-free epoxy repair mortar, expertly crafted to transform uneven concrete surfaces. This high build trowel screed, based on epoxy resin, is specially designed

to be applied with a wet film thickness of 10-30mm (3/8" - 1 1/4"). Upon curing, **Resimac 576** effectively smooths out imperfections, ensuring a more even and resilient surface.

It's more than just a repair mortar; it's a comprehensive solution for creating smooth, durable surfaces in areas requiring utmost resilience and strength.

Resimac Resichem 571: Lightweight Epoxy Repair Mortar for Concrete Surfaces

Resimac Resichem 571 Concrete Repair LW is a lightweight, three-part, solvent-free epoxy repair mortar specifically designed

for cementitious surfaces. Its uniquely lightweight composition makes it an ideal solution for repairs on overhead columns, sills, and vertical concrete surfaces where conventional heavier mortars might not be suitable.

Ideal for rebuilding and repairing lintels, sills, walls, and ceilings.

USI Fast Cure Line Striping is a two component solvent based epoxy coating that exhibits excellent characteristics for

abrasion resistance, chemical resistance, and substrate penetration. This product is suitable as a primer for high build coatings and urethane or as a stand-alone coating. **RECOMMENDED FOR:** Recommended priming or coating concrete, wood or steel. This product can withstand exposure to many common solvents and chemicals.

This product can withstand exposure to many common solvents and chemicals.
